Free 30 Day Trial³

Built from the network up, Vonage Integrations provides reliability, reduces delays, and enhances the quality of service for your Office 365 tasks, including Microsoft Teams.

¹Vonage for Microsoft Teams is powered by Call2Teams™

²Vonage for Microsoft Teams is available in the US and Canada, with more countries being added soon.

³Try Vonage for Microsoft Teams risk-free for 30 days for Vonage customers with up to 1,000 users. One (1) year contract term required. If, for any reason during the 30-day trial, you are not satisfied, simply call to cancel your service. Additional restrictions may apply.

Reimagine Collaboration and Productivity with Vonage for Microsoft Teams

Collaboration and productivity is seamless, efficient, and scalable when you use our Office 365 Integration with Vonage for Microsoft Teams[1] and your Vonage business phone system. With your messaging and voice capabilities integrated into one platform, business communication is just better.

Anytime, Anywhere Collaboration

Increase work flexibility and productivity with the best of both worlds. Make or receive calls when you're working remote or at the office with Microsoft Teams[2] enabled devices, including desk phones and mobile. At the same time, reduce the number of applications needed for business communication.

Enhance Collaboration and Productivity Without Disruptions

Vonage for Microsoft Teams means you can keep your existing phone system, which includes your desk phones, phone numbers, calling plans, extensions, and call-flows. Keep any existing call center or compliance features and integrations, as well.

Drive Cost and Time-Saving Efficiency

Experience a truly unified communications process using your Vonage integration within Microsoft Teams. Enjoy features like Call Presence, Click-to-Dial, and Voicemails with Transcription. Your Vonage Integration is easy, whether you want to add 1 or 100+ users at a time.
