# RingCentral for Okta

Seamlessly integrate your RingCentral communications and collaboration solution with Okta to create a powerful business communications and management hub.

RingCentral for Okta provides secure identity management and Single Sign-on to RingCentral applications using Active Directory or Okta Universal Directory. Easily manage any employee's access to critical business applications and devices, providing your users with a secure connection.

Features

- Sync with AD/LDAP

- Enterprise Single Sign-on

- Automated user provisioning, profile updates, and deprovisioning

- Secure mobile access

- Sync RingCentral phone numbers to Okta

- Adaptive Multi-factor Authentication
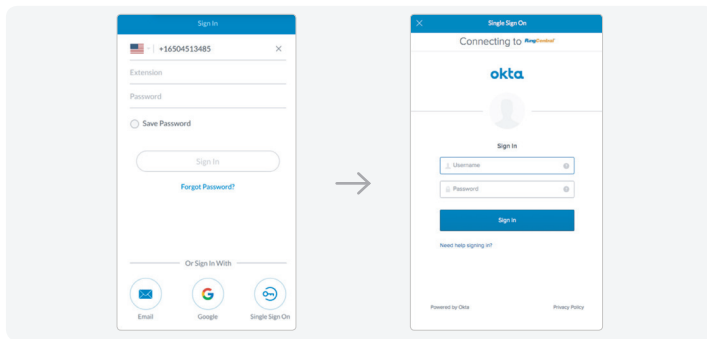

- Robust tracking and reporting

Benefits

- **Automatically assign phone numbers and extensions**
  Onboarding is seamless. As soon as you create new users in Active Directory or your HR system, they'll be provisioned to RingCentral and assigned the phone number they need.

- **Keep phone numbers up to date everywhere**
  When a user is given a phone number and extension in RingCentral, Okta will update HR, Active Directory, and other apps so you don't have to.
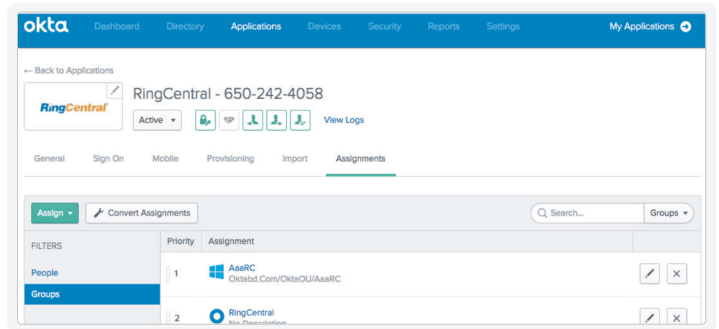

- **Take your desk phone number on the road**
  Okta can automatically deploy RingCentral to mobile devices, so you and your team can work securely from anywhere—all while making and receiving calls from your desk numbers.

- **Work more efficiently with one-time authentication**
  Single Sign-on provides users direct access to the applications they need most by signing in one time for all services. The ability to move between applications uninterrupted saves time and effort so they can focus more on their work and less on remembering passwords.

- **Effectively secure your network access**
  Enforce extended security policies including multi-factor authentication, password management, and both on network and off network controls.
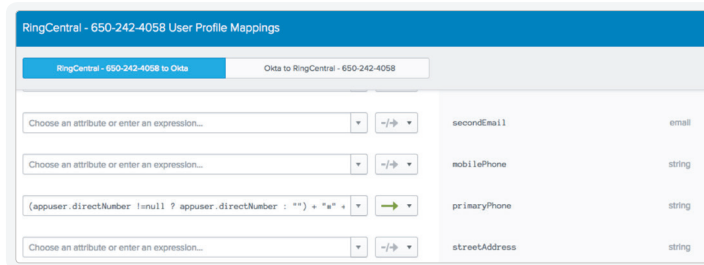

How it works

Click the "Get Okta" button on RingCentral Directory Integration page to produce a production-ready Okta instance that you can tailor for your environment.

Single Sign-on works with your RingCentral account.

Automatically provision RingCentral users based on your companies Active Directory or Okta's Universal Directory.

Two-way sync for hassle-free provisioning

System Requirements

RingCentral Office® Premium™ or Ultimate™ account
